## FQB55N06 / FQI55N06 **60V N-Channel MOSFET**

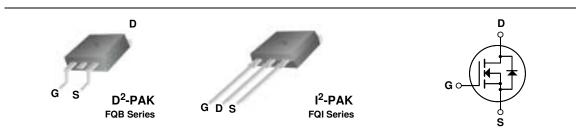

#### **General Description**

These N-Channel enhancement mode power field effect transistors are produced using Fairchild's proprietary, planar stripe, DMOS technology.

This advanced technology has been especially tailored to minimize on-state resistance, provide superior switching performance, and withstand high energy pulse in the avalanche and commutation mode. These devices are well suited for low voltage applications such as automotive, DC/ DC converters, and high efficiency switching for power management in portable and battery operated products.

#### **Features**

- •
- 55A, 60V,  $R_{DS(on)}$  = 0.020 $\Omega$  @V\_{GS} = 10 V Low gate charge ( typical 35 nC) •
- Low Crss (typical 85 pF) •
- Fast switching
- 100% avalanche tested
- Improved dv/dt capability
- 175°C maximum junction temperature rating
