Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Messrs. Digi-Key Corporation

APPROVAL SHEET

(KYOCERA CORPORATION SAW FILTER SPECIFICATION)

Kindly send us back a copy of this specification sheet with your signature.
The specification shall be regarded as "APPROVED" unless we receive your disagreement or counterproposal before your placement of initial order for the part number specified.

Part No.:SF16-0908M4UU01

Jan.,17,2011

KYOCERA CORPORATION

0.History

No	Date	Notes	Approved	Approved	Approved	Prepared
00	Jan.06 .2011	First Edition				

Approved	Approved
QA	Engineering
Approved	Prepared
Production	Engineering

1.Scope

This specification shall cover the characteristics of the RF SAW filter.

2.Customer's Part No.

3.KYOCERA's Part No.

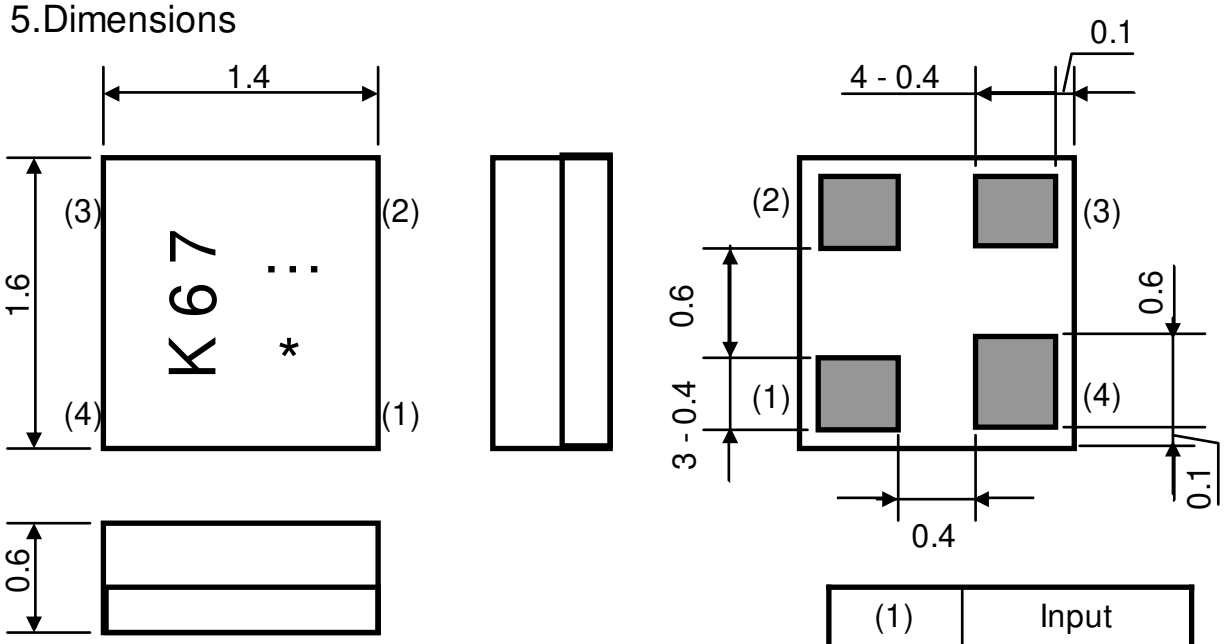
SF16-0908M4UU01

4.Electrical Characteristics

Terminating Source Impedance : 50 ohms , Single-ended
Terminating Load Impedance : 50 ohms , Single-ended
Table.1

Items		Frequency Range	Unit	Spec.		
				min.	typ.	max.
4-1	Norminal Frequency	------	MHz	-	908.42	-
4-2	Maximum Insertion Loss	898.92 to 917.92 MHz	dB	-	2.3	4.0
4-3	Amplitude Ripple(P-P)	898.92 to 917.92 MHz	dB	-	0.6	2.0
4-4	Input VSWR	898.92 to 917.92 MHz		-	2.2	2.5
	Output VSWR	898.92 to 917.92 MHz		-	2.2	2.5
4-5	Absolute Attenuation	DC to 827.92 MHz	dB	35	38	-
		853.92 to 872.92 MHz	dB	20	33	-
		943.92 to 962.92 MHz	dB	20	30	-
		988.92 to 1200 MHz	dB	35	40	-
		1200 to 2000 MHz	dB	20	29	-
4-6	Maximum Input Power		dBm	+12		
4-7	Operating Temperature		deg.C	-30 to +85		
4-8	Storage Temperature		deg.C	-40 to +85		

5.Dimensions



(1)	Input
(2)	GND
(3)	Output
(4)	GND

Unit:mm
Tol:+/-0.1mm
The degree of terminal flat : 0.10mm Max.
Terminal quality of the material : Ni Plating + Au Plating
K:Kyocera

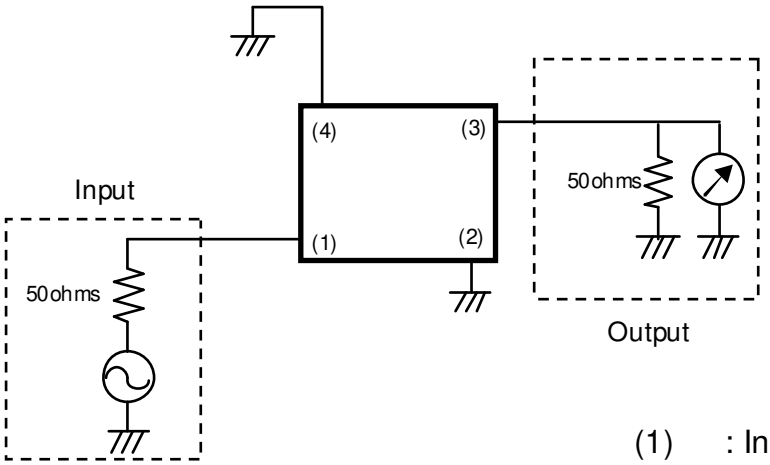
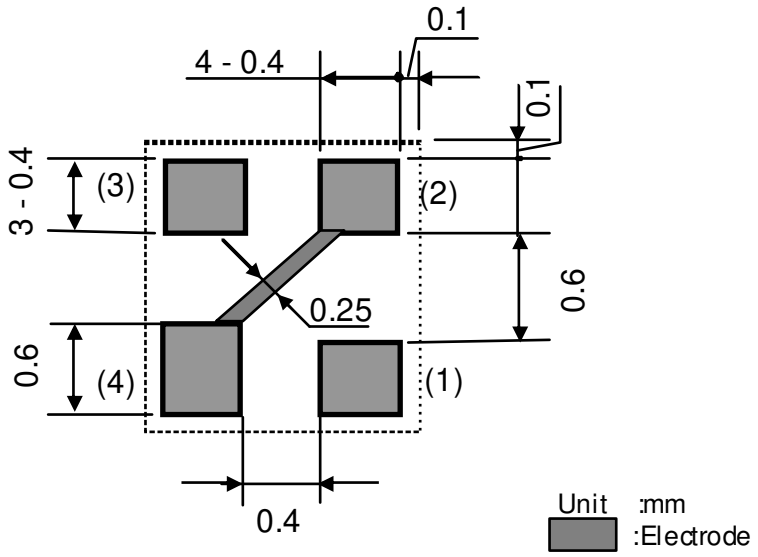
6.Measurement Circuit

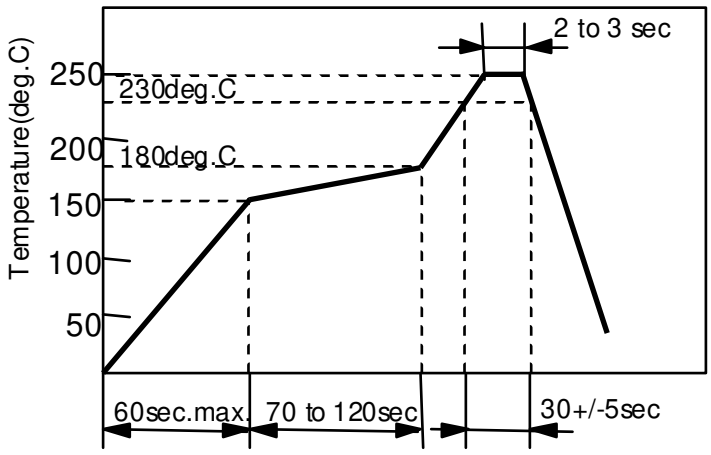


(1) : Input
(3) : Output
(2),(4) : Ground

7.Recommendable Land Pattern



8.Recommendable Reflow Soldering Profile



IR REFLOW SOLDERING
Temperature measurement point is surface of glass epoxy circuit board of 0.8mm thickness.

9.Environmental Characteristics

Item	Condition
Humidity	Subject the filter to 60+/-2 deg.C and 90%RH to 95%RH for 100 hours. Then, release the filter into the room conditions for 2 hours minimum to the measurement. It shall fulfill the specifications in Table 1.
High Temperature Storage	Subject the filter to 85+/-2 deg.C for 100 Hours. Then, release the filter into the room conditions for 2 hours minimum to the measurement. It shall fulfill the specifications in Table 1.
Low Temperature Storage	Subject the filter to –40+/-2 deg.C for 100Hours. Then, release the filter into the room conditions for 2 hours minimum to the measurement. It shall fulfill the specifications in Table 1.
Resistance to Reflow Solder Heat	Expose filter to increasing temperature with a minimum total exposure above 230 deg.C of 30+/-5 seconds and must include 2-3 seconds at peak temperature of 250 deg.C, twice. Then, release the filter into the room conditions for 2 hours minimum to the measurement. It shall fulfill the specifications in Table 1.
Temperature Cycle	10 Cycles (1 cycles:-40 deg.C for 30minutes then 25 deg.C for 15minutes then 85 deg.C for 30minutes.) An examination is done under the evaluation circuit board mounting condition. Then, release the filter into the room conditions for 2 hours minimum to the measurement. It shall fulfill the specifications in Table 1.
Vibration	Subject the filter to vibration for 2hour each In the X,Y and Z axes with the amplitude of 1.5mm, 10 to 55 Hz/min. It shall fulfill the specifications in Table 1.
Mechanical Shock1	Subject the filter to 3 shocks in each direction of six mutually perpendicular planes (a total of 18 shocks). Each shock shall be a sine wave shaped with a magnitude of 100 G and a duration of 6 mseconds. It shall fulfill the specifications in Table 1.
Mechanical Shock2	Drop the filter randomly onto a concrete floor from the Height of 1m, 3 times. It shall fulfill the specifications in Table 1.
ESD	A direct current voltage is increased to DEVICE mounted on the evaluation circuit board. The failure rate which occurred by the direct current voltage is investigated.A direct current voltage begins from 39V. As for the voltage,it increses with step of E12 series.A failure voltage is prescribed in the direct current voltage that an accumulate trouble rate is 0.1%.It is judged with the trouble when increase in the insertion loss occurs beyond 0.3dB before and after the examination.A failure voltage is more than 50V. (Fig.-1)

ESD TEST Circuit(Machine Model)

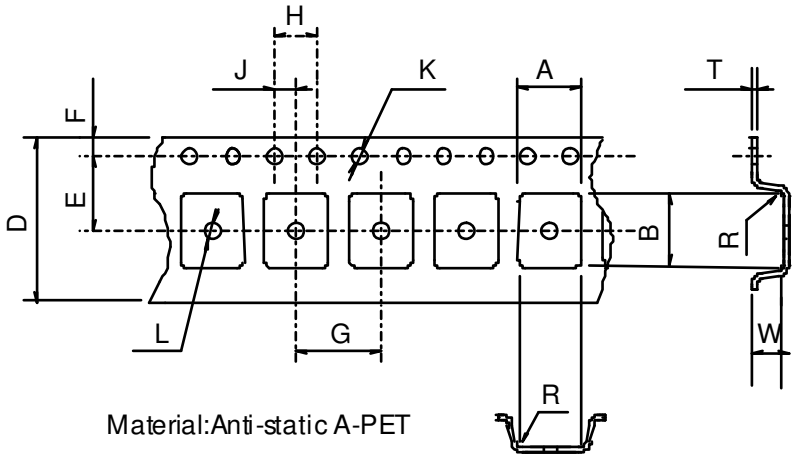
10.Taping Specification

10-1.Tape

10-1-1. Tape Material

Polycarbonate(EC-AP), or PS materials (conductivity type).

10-1-2. Tape Dimensions



Material:Anti-static A-PET

Part	A	B	D	E	F
Dimension	1.85+/-0.1	1.90+/-0.1	8.0+/-0.2	3.5+/-0.05	1.75+/-0.1
Part	G	H	J	K	L
Dimension	4.0+/-0.1	4.0+/-0.1	2.0+/-0.05	1.5+/-0.1	1.1+/-0.1
Part	R	W	T		
Dimension	0.3 MAX	0.95+/-0.2	0.25+/-0.05		

Unit[mm]

* W Dimension is depth of pockets.

10-2.Taping

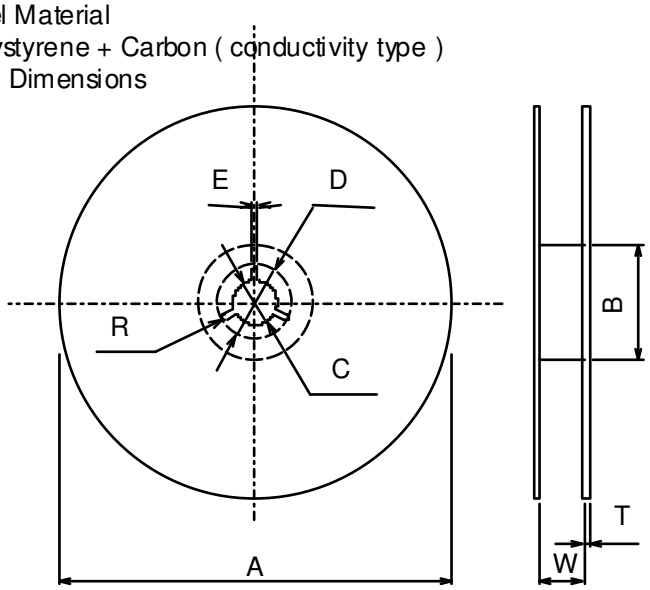
10-2-1.Taping Quantity

One reel of tape shall pack 3,000 filters maximum.
No filter shall be missing and contained continuously in pocket.

10-2-2. Reel Material

Polystyrene + Carbon (conductivity type)

10-2-3.Reel Dimensions

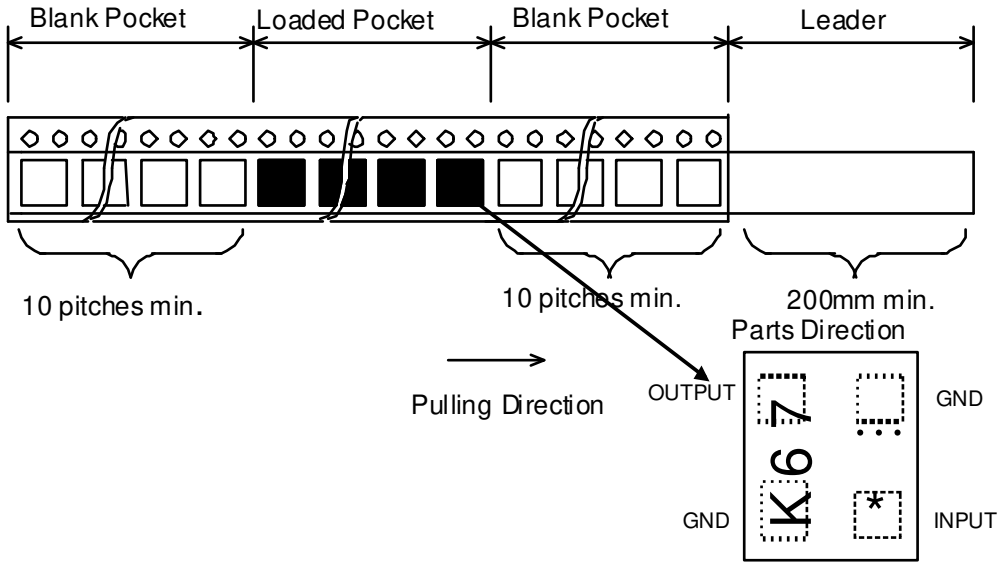


Part	A	B	C	D
Dimension	178+/-2	60+/-2	13+/-0.2	21+/-0.8
Part	E	R	W	T
Dimension	2+/-0.5	R 1	9.5+/-1	2.0+/-0.2

Unit[mm]

10-2-4 Leader and blank pocket

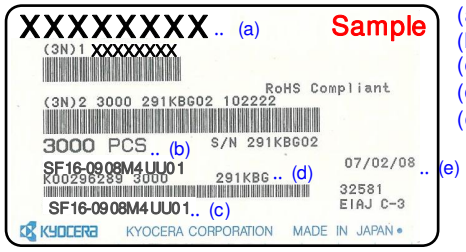
Package shall consist of Leader and Blank Pocket as follows.



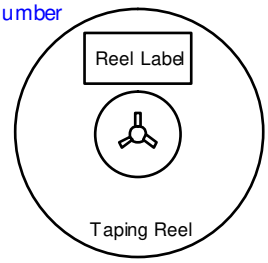
10-2-5 Reel Label

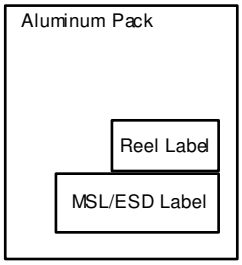
The following contents are indicated in a reel.

Reel Label (EIAJ-C3 Label)



(a) Customer Parts Number
(b) Quantity
(c) Parts Name
(d) Lot number
(e) Shipping date

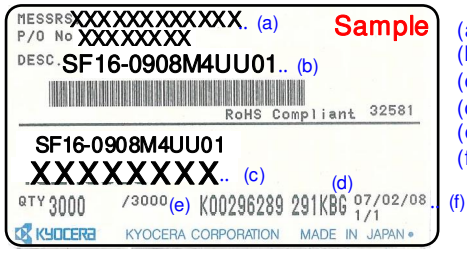




10-2-6 Packing case Label

During transportation, after packing into an aluminum bag for every reel so that a damage and moisture absorption may not be given to a product, it puts into a packing box.

The following contents are indicated in a packing case.

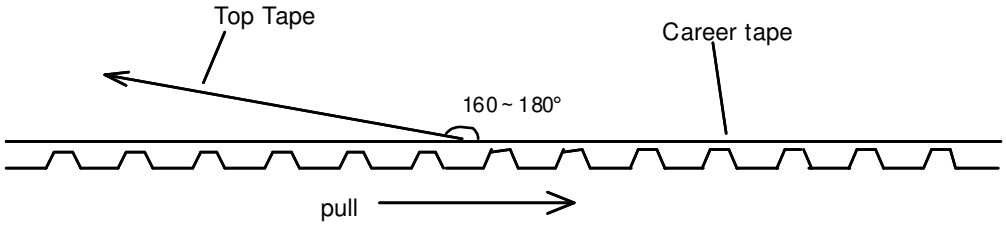


(a) Customer name
(b) Parts name
(c) Customer Parts number
(d) Lot number
(e) Quantity
(f) Shipping date

10-2-7 Taping flaking off strength Test

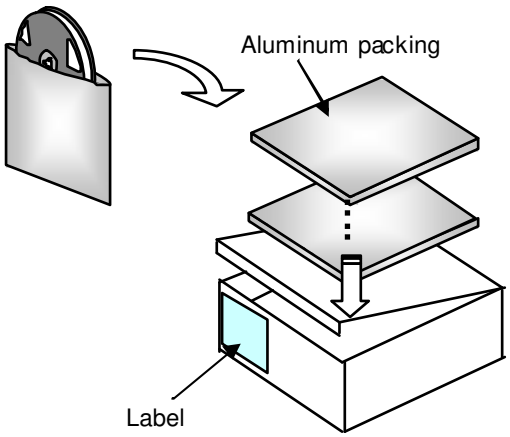
Test Condition : 120mm/min 160-180deg

Range of strength : 0.098 – 0.98 N



10-2-8 Packing form

The reel is packed in aluminum, and it is packed to the box.



11.Precaution in handling

Please handle with below condition.

1. Calculated shelf life in sealed bag: 6 months at ≦ 40℃ and ≦ 90% relative humidity (RH) .
2. After bag is opened, devices should be mounted within 168 hours of factory conditions ≦30℃/ 60% RH.
   Exposed over 168 hours parts are recommended to make pre treatment of 60 ℃ 1 hour baking just before
   use. (In case left further longer since unpacked, please check solderability before use.)
3. Expiration date : 6 months form sealing date, which is imprinted on the adjacent bar code label.
4. This components are static sensitivity parts. Please handle with care.
5. On circuit design, it is strongly recommended to put DC cut capacitor for this SAW filter.
6. This component can not be used in resin molding.
